INDEX TO VOLUME 23 — 1988

Index to authors and contributors

AERNOUDT, E. *Paper* A fully automated method for the alignment of stress goniometers, 155
ANG, H. E. *Paper* Stress concentrations at holes in thin rotating discs, 223

BLACHUT, J. *Paper* Clamped torispherical shells under external pressure – some new results, 9
BOLOURCHI, F. *Paper* Contributions of rider-induced loads to bicycle frame stress, 105
BROWN, C. J. *Paper* A photoelastic study of tool stresses caused by unsteady, shear localised chip formations during machining, 159

CHAMBERS, A. C. *Paper* A compact mixed-mode (CMM) fracture specimen, 61
CHAN, W. K. *Paper* The application of thermoelastic stress analysis techniques to composite materials, 137

DRAGONI, E. *Paper* A contribution to wave spring design, 145

EVANS, K. E. *Papers* A strain-based tensor polynomial failure criterion for anisotropic materials, 179. Effect of changes in elastic constants on the strength of composites, 213

FESSLER, H. *Paper* Bolting and loss of contact between cylindrical flat-flanged joints without gaskets, 1

GALLETLY, G. D. *Paper* Clamped torispherical shells under external pressure – some new results, 9

HALL, R. W. *Paper* The numerical solution of some singular contact problems using a Hilbert transformation, 129
HINDS, B. K. *Paper* A photoelastic study of tool stresses caused by unsteady, shear-localised chip formations during machining, 159
HOBBS, R. E. *Paper* Torsion tests on large spiral strands, 97
HOLLSTEIN, T. *Paper* Fracture mechanics characterisation of crack growth under creep conditions, 87
HULL, M. L. *Paper* Contributions of rider-induced loads to bicycle frame stress, 105
HYDE, T. H. *Papers* Bolting and loss of contact between cylindrical flat-flanged joints without gaskets, 1. A compact mixed-mode (CMM) fracture specimen, 61

JAFFAR, M. J. *Paper* On the numerical solution of line contact problems involving bonded and unbonded strips, 67
JONES, N. *Paper* Axial – torsional interactions and wire deformations in 19-wire spiral strand, 79
JONSSON, M. *Paper* Experimentally determined transient and residual stresses in a butt-welded pipe, 25
JOSEFSON, B. L. *Paper* Experimentally determined transient and residual stresses in a butt-welded pipe, 25

KIENZLER, R. *Paper* Fracture mechanics characterisation of crack growth under creep conditions, 87
KITCHING, R. *Paper* GRP pipe bends subjected to out-of-plane flexure with and without pressure, 187

LEGGATT, R. H. *Paper* Neutron diffraction measurements of residual stress and plastic deformation in an aluminium alloy weld, 201
LEWIS, L. V. *Paper* Bolting and loss of contact between cylindrical flat-flanged joints without gaskets, 1

MACGILLIVRAY, H. J. *Paper* Neutron diffraction measurements of residual stress and plastic deformation in an aluminium alloy weld, 201
MILLS, G. *Paper* Neutron diffraction measurements of residual stress and plastic deformation in an aluminium alloy weld, 201
MYLER, P. *Paper* GRP pipe bends subjected to out-of-plane flexure with and without pressure, 187

NICOLETTO, G. *Paper* Theoretical fringe analysis for a coherent optics method of residual stress measurement, 169

RAOOF, M. *Paper* Torsion tests on large spiral strands, 97
REES, D. W. A. *Paper* An examination of the neutral loading condition in plasticity theory, 47

SADD, M. *Paper* Angular dependence of dynamic load transfer due to explosive loading in two-dimensional granular aggregates, 121
SAVAGE, M. D. *Paper* On the numerical solution of line contact problems involving bonded and unbonded strips, 67
SERRUYS, W. *Paper* A fully automated method for the alignment of stress goniometers, 155
SHARIFF, M. H. B. M. *Paper* An approximate analysis of infinitessimal deformations of bonded leastic mounts, 115
SHUKLA, A. *Paper* Angular dependence of dynamic load transfer due to explosive loading in two-dimensional granular aggregates, 121
SMITH, D. J. *Paper* Neutron diffraction measurements of residual stress and plastic deformation in an aluminium alloy weld, 201
STANLEY, P. *Papers* A study of the diffusion analogy technique for the photoelastic determination of transient thermal stresses, 33. The application of thermoelastic stress analysis techniques to composite materials, 137
SWEENEY, J. *Research Note* Revised values of finite width correction factors for SEN testing of orthotropic materials, 227

TAN, A. L. *Paper* GRP pipe bends subjected to out-of-plane flexure with and without pressure, 187
TAN, C. L. *Paper* Stress concentrations at holes in thin rotating discs, 223

UTTING, W. S. *Paper* Axial – torsional interactions and wire deformations in 19-wire spiral strand, 79

VAN HOUTTE, P. *Paper* A fully automated method for the alignment of stress goniometers, 155

WEBSTER, G. A. *Paper* Neutron diffraction measurements of residual stress and plastic deformation in an aluminium alloy weld, 201
WEBSTER, P. J. *Paper* Neutron diffraction measurements of residual stress and plastic deformation in an aluminium alloy weld, 201

YIP, Y. J. *Paper* A study of the diffusion analogy technique for the photoelastic determination of transient thermal stresses, 33

ZHANG, W. C. *Papers* A strain-based tensor polynomial failure criterion for anisotropic materials, 179. Effect of changes in elastic constants on the strength of composites, 213
ZHU, C. Y. *Paper* Angular dependence of dynamic load transfer due to explosive loading in two-dimensional granular aggregates, 121

Subject Index

A COMPACT MIXED-MODE (CMM) FRACTURE SPECIMEN, *Paper*, 61
A CONTRIBUTION TO WAVE SPRING DESIGN, *Paper*, 145
A FULLY AUTOMATED METHOD FOR THE ALIGNMENT OF STRESS GONIOMETERS, *Paper*, 155
A PHOTOELASTIC STUDY OF TOOL STRESSES CAUSED BY UNSTEADY, SHEAR LOCALISED CHIP FORMATIONS DURING MACHINING, *Paper*, 159
A STRAIN-BASED TENSOR POLYNOMIAL FAILURE CRITERION FOR ANISOTROPIC MATERIALS, *Paper*, 179
A STUDY OF THE DIFFUSION ANALOGY TECHNIQUE FOR THE PHOTOELASTIC DETERMINATION OF TRANSIENT THERMAL STRESSES, *Paper*, 33
Aggregates, granular, 121
Alloy, aluminium, 201
Alluminium alloy weld, 201
AN APPROXIMATE ANALYSIS OF INFINITESSIMAL DEFORMATIONS OF BONDED ELASTIC MOUNTS, *Paper*, 115
AN EXAMINATION OF THE NEUTRAL LOADING CONDITION IN PLASTICITY THEORY, *Paper*, 47
ANGULAR DEPENDENCE OF DYNAMIC LOAD TRANSFER DUE TO EXPLOSIVE LOADING IN TWO-DIMENSIONAL GRANULAR AGGREGATES, *Paper*, 121
Anisotropic materials, 179
Application of thermoelastic stress analysis techniques to composite materials, 137
AXIAL – TORSIONAL INTERACTIONS AND WIRE DEFORMATION IN 19-WIRE SPIRAL STRAND, *Paper*, 79

Bicycle frame stress, 105
BOLTING AND LOSS OF CONTACT BETWEEN CYLINDRICAL FLAT-FLANGED JOINTS WITHOUT GASKETS, *Paper*, 1
Bonded elastic mounts, infinitessimal deformations of, 115
Bonded strips, line contact problems involving, 67
Butt-welded pipe, transient and residual stresses in, 25

Chip formations, unsteady, shear localised, 159
CLAMPED TORISPHERICAL SHELLS UNDER EXTERNAL PRESSURE – SOME NEW RESULTS, *Paper*, 9
CMM specimen, *see* Compact mixed-mode fracture specimen
Coherent optics method of residual stress measurement, 169
Compact mixed-mode fracture specimen, 61
Composite materials, application of thermoelastic stress analysis techniques to, 137
Composites, Strength of, 213
Constants, elastic, 213
Contact:
  line, 67
  loss of, between cylindrical flat-flanged joints without gaskets, 1
  problems, singular, 129
CONTRIBUTIONS OF RIDER-INDUCED LOADS TO BICYCLE FRAME STRESS, *Paper*, 105
Correction factors, finite width, 227
Crack growth, characterisation of, under creep conditions, 87
Creep conditions, crack growth under, 87
Cylindrical flat-flanged joints without gaskets, loss of contact between, 1

Deformation:
  plastic, 201
  wire, 79
Deformations, infinitessimal, of bonded elastic mounts, 115
Diffusion analogy technique, study of, 33
Discs, thin, 223
Dynamic load transfer, angular dependence of, 121

EFFECT OF CHANGES IN ELASTIC CONSTANTS ON THE STRENGTH OF COMPOSITES, *Paper*, 213
Elastic constants, effect of changes in, on the strength of composites, 213
Elastic mounts, bonded, 115
Examination of the neutral loading condition in plasticity theory, 47
EXPERIMENTALLY DETERMINED TRANSIENT AND RESIDUAL STRESSES IN A BUTT-WELDED PIPE, *Paper*, 25
Explosive loads, dynamic load transfer due to, 121
External pressure, clamped torispherical shells under, 9

Failure criterion, 179
Finite width correction factors, revised values of, 227
Flanges, cylindrical, flat, 1
Flat-flanged joints, cylindrical, 1
Flexure, out-of-plane, 187
FRACTURE MECHANICS CHARACTERISATION OF CRACK GROWTH UNDER CREEP CONDITIONS, *Paper*, 87
Fracture specimen, compact mixed-mode, 61
Frame, bicycle, 105
Fringe analysis, theoretical, 169
Fully automated method for the alignment of stress goniometers, 155

Gaskets, 1
Goniometer, stress, 155
Granular aggregate, two-dimensional, 121
GRP PIPE BENDS SUBJECTED TO OUT-OF-PLANE FLEXURE WITH AND WITHOUT PRESSURE, *Paper*, 187

Hilbert transformation

Joint, flat-flanged, 1

Large spiral strands, torsion tests on, 97
Line contact problems involving bonded and unbonded strips, 67
Load transfer, dynamic, 121
Loading, explosive, 121
Loading condition, neutral, in plasticity theory, 47
Loads, rider-induced, contribution to bicycle frame stress, 105
Loss of contact between cylindrical flat-flanged joints without gaskets, 1

Machining, chip formations during, 159
Materials:
  anisotropic, 179
  composite, 137
  orthotropic, 227
Measurement, stress, 169
Mounts, elastic, 115

Neutral loading condition, examination of, 47
NEUTRON DIFFRACTION MEASUREMENTS OF RESIDUAL STRESS AND PLASTIC DEFORMATION IN AN ALUMINIUM ALLOY WELD, *Paper*, 201
Numerical solution:
  of line contact problems, 67
  of some singular contact problems using a Hilbert transformation, 129

ON THE NUMERICAL SOLUTION OF LINE CONTACT PROBLEMS INVOLVING BONDED AND UNBONDED STRIPS, *Paper*, 67
Optics method of residual stress measurement, 169
Orthotropic materials, SEN testing of, 227
Out-of-plane flexure, GRP pipe bends subjected to, 187

Photoelastic determination of transient thermal stresses, study of the diffusion analogy technique for, 33
Photoelastic study of tool stresses caused by unsteady, shear localised chip formations during machining, 159
Pipe:
  butt-welded, 25
  GRP, 187
Plastic deformation in an aluminium alloy weld, 210
Plasticity theory, 47
Polynomial, tensor, 179
Pressure:
  external, clamped torispherical shells under, 9
  GRP pipe bends subjected to out-of-plane flexure with and without, 187

Residual stress:
  experimentally determined in a butt-welded pipe, 169
  in an aluminium alloy weld, 201
  method of measurement, 169

REVISED VALUES OF FINITE WIDTH CORRECTION FACTORS FOR SEN TESTING OF ORTHOTROPIC MATERIALS, *Research Note*, 227
Rider-induced loads, contribution to bicycle frame stress, 105
Rotating discs, 223

SEN testing of orthotropic materials, 227
Shells, torispherical, 9
Specimen, fracture, 61
Spiral strands:
  large, 97
  19-wire, 79
Spring, wave, 145
Strain-based tensor polynomial criterion for anisotropic materials, 179
Strands, spiral, 79, 97
Stress:
  analysis, thermoelastic, 137
  bicycle frame, 105
  concentrations at holes in thin rotating discs, 223
  goniometers, alignment of, 155
  residual, 169, 201
Stresses:
  in a butt-welded pipe, 25
  thermal, 33
  tool, 159
  transient, 33
Strips:
  bonded, 67
  unbonded, 67
Study of the diffusion analogy technique for the photoelastic determination of transient thermal stresses, 33

Tensor polynomial, strain-based, 179
Testing, SEN, 227
Tests, torsion, 97
THE APPLICATION OF THERMOELASTIC STRESS ANALYSIS TECHNIQUES TO COMPOSITE MATERIALS, *Paper*, 137
THE NUMERICAL SOLUTION OF SOME SINGULAR CONTACT PROBLEMS USING A HULBERT TRANSFORMATION, *Paper*, 129
THEORETICAL FRINGE ANALYSIS OF A COHERENT OPTICS METHOD OF RESIDUAL STRESS MEASUREMENT, *Paper*, 169
Thermal stresses, transient, 33
Thermoelastic stress analysis techniques, 137
Thin rotating discs, stress concentrations at holes in, 223
Tool stresses, photoelastic study of, 159
Torispherical shells, clamped, 9
TORSION TESTS ON LARGE SPIRAL STRANDS, *Paper*, 97
Transient stresses:
  experimentally determined, in a butt-welded pipe, 25
  thermal, 33
Two-dimensional granular aggregates, 121

Unbonded strips, line contact problems involving, 67

Wave spring design, a contribution to, 145
Weld, aluminium alloy, 210
Wire deformation in 19-wire spiral strand, 79
